

event.closest() logic to find
the delete button.

- * hum nay JS ka use krday huay
createElement ka use krday huay
delete button bana lia and uss
ka class name "delete" rakh dia.
- * event.target → mei wo element
aaye ga jis pr click hua. delete
- * event.target.closest(".delete")
nearest delete element find krday ga.
- * if (deleteButton) mil gya
to deleteButton ka nearest parent
find krday ga and uss ko list
mei remove kr day ga.

Logic
Flow

```

Click
↓
event.target
↓
closest(".delete")
↓
delete button
↓
closest("li")
↓
parent("li")
↓
li.remove()
↓
Task completed
  
```
